

HANDWRITING CLUB

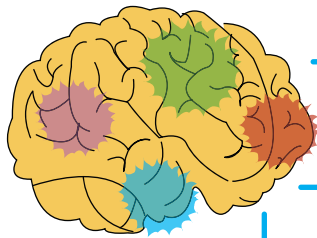

Do you know a child that struggles with handwriting?

- having trouble focusing
- doing poorly academically
- difficulty making letters
- difficulty coloring in the lines
- low self esteem
- frustration

25-33%
of children struggle with handwriting

Handwriting is not just an essential skill every child needs to develop for academic success. Handwriting helps increase brain activity so that children can effectively learn how to:

- read
- develop fine motor skills
- gain self control & independence
- increase focus & improve memory
- provide self confidence

How can the Handwriting Club help?

Customized program to meet each child's needs. Multi-sensory strategies & whole brain learning featuring The Handwriting Without Tears® program. Designed & run by licensed, highly skilled & passionate Occupational Therapists in a fun & engaging sensory motor learning center.

-CALL FOR TIMES-

GRADES: K - 4TH

Illegible handwriting is a problem for a large number of children...it can affect [children] not only personally (their self-esteem), but also academically, and their careers in the future. So, it's got a very long trajectory.
— Dr. Gerry Conti, assistant professor of occupational therapy at Wayne State University
